**Master Colors®, LLC the “World leader in *Color Quantification Technology*” announces the immediate availability of the HVC Color Composer™ Professional Plug-in for InDesign® for the Mac.**

Master Colors®, LLC, developer of a line of critically acclaimed, award winning plug-ins for Adobe® Photoshop® and InDesign® has just unveiled the latest addition to its rapidly expanding line of plug-ins. The HVC Color Composer Professional plug-in for Adobe® InDesign® CS and CS2 for the Mac® is immediately available. The HVC Color Composer will be compatible with CS3 shortly after Adobe releases its final shipping version of CS3.as a free update.

Master Colors’® top selling Photoshop plug-in the HVC Color Composer™ Professional for Adobe Photoshop® just received a “Five Star” rating by PhotoshopUser magazine in its most recent issue January ’07.

***“Master Colors® HVC Color Composer™ is a designer’s dream tool...HVC shines...five stars!”***

– PhotoshopUser Magazine Jan’07

Master Colors® patented technology\* offers artists the only known objective method of color composition, with an approach that can be clearly explained. This knowledge actually enhances the subjective, intuitive aspects of the artistic process. Why? Because whatever the personal and intuitive feelings the artist has, the HVC Color Composer™ provides an underlying orderliness that make the subjective color choices of artists designers and digital photographers shine. Additionally Master Colors® HVC pigment-friendly color space delivers colors that are in a gamut that all printers can hit. Imagine designing a project from beginning to end and actually getting the results that you expect without having to pay more. Master Colors® has organized the science of color harmonics in such a way that it can easily be understood and used by any artist, designer digital photographer or prepress professional.
